FULACTIF

TECHNICAL DATA SHEET

FULVIC ACID-BASED NUTRIENT ACTIVATOR

PRODUCT DESCRIPTION

FULACTIF is a liquid plant nutrition activator formulated with fulvic acids to enhance nutrient availability and support plant development. Its high fulvic acid content provides natural chelating properties, helping improve uptake by the plant. The organic matter content also contributes to better soil structure, stimulates biological activity, and promotes favorable conditions for root nutrient absorption.

CHEMICAL COMPOSITION

Components	Total organic matter	Fulvic acids	Potassium Oxide (K_2O)	Phosphorus Pentoxide (P_2O_5)	Total Nitrogen (N)
Content	27%	15%	7,4%	0,7%	2,29%

PHYSICAL PROPERTIES

Solubility	**Density**	**pH**
100% soluble	1,3	2,5

KEY BENEFITS

- Improve nutrient uptake.
- Enhance vegetative vigor.
- Contribute to improved crop yield and quality.

APPLICATION METHOD

- **Target crops:** Suitable for all crops.
- **Application rate:** 5 L/ha via drip irrigation.
- **Application frequency:** Every 15 days.

* Non-contractual commercial document, subject to change.

NUTRIBIOTEK

Batch N°. 83, CFCIM Industrial Park, Ouled Saleh, Nouaceur Province,
Postal Code: 27184, Casablanca – Morocco

PRODUCT PACK SIZES

Available in 5 L and 10 L

CONDITIONS OF USE

- Shake well before use.
- Wear appropriate protective equipment.
- Keep out of reach of children.
- Avoid contact with eyes and skin.
- Do not ingest.

STORAGE CONDITIONS

- Store in a dry, well-ventilated area.
- Store at an ambient temperature below 35°C.

* Non-contractual commercial document, subject to change.
