TECHNICAL DATA SHEET

SOIL SALINITY CORRECTOR

PRODUCT DESCRIPTION

ZALYNE is a liquid agricultural solution formulated with organic matter and enriched with calcium. It helps correct soil salinity while providing crops with an effective source of readily available calcium. ZALYNE works by reducing the negative effects of sodium (Na^+) in the soil, while promoting soil biological activity and improving nutrient availability to plants.

CHEMICAL COMPOSITION

Components	Organic matter	Calcium (Ca)	Total Nitrogen (N)	Humic and Fulvic Acids	Boron (B)
Content	23%	6,2%	5,35%	8%	1%

PHYSICAL PROPERTIES

Solubility	**Density**	**pH**
100% soluble	1.35	3

KEY BENEFITS

- Adress soil salinity and calcium deficiencies.
- Improve soil structure.
- Contribute to better yields and crop quality.

APPLICATION METHOD

- **Target crops:** Suitable for all crops.
- **Application rate:** 5 L/ha via drip irrigation.
- **Application frequency:** Every 10 days.

* Non-contractual commercial document, subject to change.

NUTRIBIOTEK

Batch N°. 83, CFCIM Industrial Park, Ouled Saleh, Nouaceur Province,
Postal Code: 27184, Casablanca – Morocco

PACK SIZES

Available in 5 L and 10 L pack sizes.

CONDITIONS OF USE

- Shake well before use.
- Wear appropriate protective equipment.
- Keep out of reach of children.
- Avoid contact with eyes and skin.
- Do not ingest.

STORAGE CONDITIONS

- Store in a dry, well-ventilated area.
- Protect from extreme temperatures.

* Non-contractual commercial document, subject to change.
